

Inspect Exception of Team 1 “Techware”

Inspector: Paul Moreno, team 3 “ theEncoders”

- In the method to add an employee, if I write a string in the ID it gives an error.
- In the method to add a product, if i write a string in the total to pay gives an error.
- In the method to add a product, the system doesn't let me give data.
- In the method to add an administrator, if I write a string in the ID it gives an error.
- In the method to register a Sale , if I write a string in the ID it gives an error.

Recommendation:

Do exceptions in the methods that enter data type int or float, don't let enter data type String.
